Project Design Phase-I
Solution Architecture

Date	19 September 2023
Team ID	NM2023TMID08133
Project Name	Data-Driven insight on Olympic sports participation and performance
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:
Find the best tech solution to solve existing business problems.

- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.

- Define features, development phases, and solution requirements.

- Provide specifications according to which the solution is defined, managed, and delivered.

## Example - Solution Architecture Diagram:

Figure 1: Architecture and data flow of the voice of Data-Driven insight on Olympic sports participation and performance
